Empty containers APMTII

Dear Customer,

Current irregularities as result of (inter)national precautionary measures in respect of COVID-19 is resulting in large deviations from normal pick-up and delivery patterns of containers. These deviations are resulting in yard densities increasing more than average. Therefore we unfortunately are forced to initiate precautionary yard density control measures.

This means that APM Terminals MVII will STOP accepting empty 20 ft dry Maersk containers delivered all modalities as from 02/06/2020 15h01.

We will keep you posted as soon as the situation will change.

Mit freundlichen Grüßen / With kind regards / Met vriendelijke groeten,

Optimodal Nederland B.V.

Good. Better. Optimodal.
