Terminal shutdown Neuss Trimodal

Dear Customer,

Unfortunately, we have to inform you that due to the unusual onset of winter, we have not yet found a way to activate the crane systems permanently and to resume handling operations.

The overall situation is also made more difficult by the fact that, according to the information available to us, the Neuss freight station (Neuss Güterbahnhof) has also been closed.

The reach stackers have reached their load limit and also the parking bays and the emergency reserves are working at 100% capacity.

Therefore, our terminal partner is forced to stop the handling operation with immediate effect.

We sincerely regret this and kindly ask for your understanding.

We will inform you immediately as soon as the terminal can resume operations.

With kind regards,

Optimodal Nederland B.V.
