## Update 3 - Weather

Dear Customers,

Unfortunately, the situation in the seaports has not yet eased further. RWG has just become the last terminal to resume limited operations, but so far not on the rail side. We are currently waiting there with a train for processing. In addition, shunting operations are currently not possible in the port area, which means that our trains cannot currently run from EMX to ECT and from APMTII to RWG.

Due to the continuing circumstances, there is another cancellation ex Rotterdam this morning. Therefore, the departure tomorrow early morning ex Neuss to Rotterdam is unfortunately cancelled.

The infrastructural problems on the route Kijfhoek - Germany have been solved, but the border crossing Emmerich is still not passable. Here we are also waiting for further information.

We hope that the dispatch of a train can take place today at noon at RWG and that this train can depart ex Rotterdam towards Neuss during the night.

Unfortunately, the situation in Antwerp has not eased further either. Yesterday evening, terminal 1742 has ceased operation until further notice, so that this terminal can currently not be approached. For this reason, today's departure ex Antwerp is cancelled.

We will of course keep you informed about the progress. We will do everything possible to minimize the impact on your cargo due to the "force majeure" and thank you in advance for your understanding.

If you have any questions regarding specific containers/bookings, please do not hesitate to contact our customer service directly.

We apologize for any inconvenience caused by the weather conditions.

With kind regards,

Optimodal Nederland B.V.
