Update - Terminal shutdown Neuss Trimodal

Dear Ladies and Gentlemen,

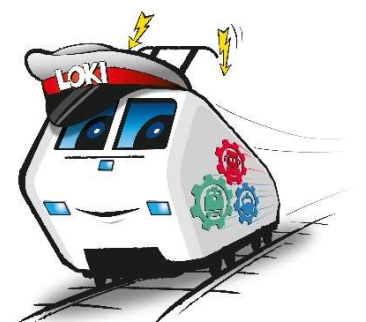

Unfortunately, we have to inform you that the salvage operations are still continuing. Part of the terminal was able to resume operations. The crane module has not yet released and is still out of service.

We hope that the salvage work will be completed in the next few hours, but currently we cannot give any further forecast.

We sincerely regret this and kindly ask for your understanding.

With kind regards,

Optimodal Nederland B.V.

Good. Better. Optimodal.
